GEMINI²® MCU™ Multiple Chemical Unit

GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™ - GEMINI²® MCU™

Store multiple chemicals in a single, multi-compartment dual containment tank. Configure two, three, or four different liquids in one compact space, with 2 separate containment chambers that is as flexible as you need it to be. The Gemini2 MCU™ (Multiple Chemical Unit) has individual primary Tanks available in 6 and 12-gallon sizes. Configure your tank with (2) 12-gallon tanks, (1) 12-gallon and (2) 6-gallon tanks or (4) 6-gallon tanks, all in one compact space. Great for Biocide/Inhibitor set-ups, Pool Chemical feed systems or any other application where you require multiple chemicals with limited space for storage.

An optional overhead PumpDeck™ can be integrally mounted to the MCU™ with room for up to 4 metering pumps. The PumpDeck™ is designed to contain pump drips or minor spills that will drain back into the correct tank and can also be equipped with an alarm that will warn you of leaks in both the shelf and/ or the interstitial space before it's a problem.

- Takes up only a 25" square footprint of space x 27" in height, 47" in height with PumpDeck™.
- Can be configured for 2, 3, or 4 containers.
- An overhead PumpDeck™ option is available.
- Tank and PumpDeck™ leak detection system is available with flashing strobe and audible alarm.
- An optional funnel is also available for easy filling from a pail or carboy.
- Available in LPE, XLPE, PPL or PVDF for a wide range of chemical compatibility.
- Tank can be supplied with a combination of blue and natural tanks (or other colors) for easy visual identification of different chemicals.
