

KEEP EACH FILTER WRAPPED UNTIL READY FOR USE

4-PRO™ DEHUMIDIFIER FILTER

Designed *specifically* for professional use in restoration, remediation and construction environments

ONE FILTER Protects in FOUR WAYS
 Preserves your dehumidifier's efficiency while protecting operators and occupants

- 1** Targets smaller particles with a layer of **electrostatically charged polypropylene**
- 2** Reduces build-up on internal dehumidifier components by capturing large particles with **expanded cellulose mesh**
- 3** Adsorbs odors and fumes with **activated carbon**
- 4** **Antimicrobial-treated filter media***

For best performance change filter often. Replace filter whenever it appears dirty or heavily loaded with particles – do not vacuum or wash and reuse. **Do NOT** operate dehumidifiers while drywall sanding, generating sawdust or in spaces with excessive airborne particulates.
