

WHY CHOOSE THE NEW 4-POINT CHINSTRAP?

At MSA Safety, our mission is to continuously improve your safety and comfort. With this in mind we have developed the MSA V-Gard® Universal 4-Point Chinstrap, compatible with all MSA hard hats.

SAFETY FIRST!

The 4-point connection ensures excellent stability of the hard hat on your head.

No metallic parts (important when you're working in electrical applications).

COMFORTABLE!

The soft strap (made from OEKO TEX® approved fabric), front adjusters and elastic below the chin make it easily adjustable and very comfortable, even during full shifts.

FLEXIBLE!

Compatible with the use of other PPE e.g. helmet-mounted hearing protection.

PRACTICAL!

Its unique, quick and easy innovative mounting process, directly on the suspension, makes it suitable for use with Fas-Trac® III and therefore compatible with most MSA hard hats.

Easy and secure mounting helps to protect you against any risk of unexpected removal.
