

3 Pocket Tablet Mat

During long flows, this 18" 3-pocket tablet mat is best used by alternating it with a second mat. A single mat holds 3 Vita-D-Chlor Tablets, enough for most flows up to 500 gpm.

6 Pocket Tablet Strip

The 6-pocket tablet strip measures 6" x 39" and is ideal for laying in the flow stream.

24 Pocket Tablet Mat

Measuring at 36" x 44", the 24-pocket mat is excellent for laying over a grate, drain, or manhole.

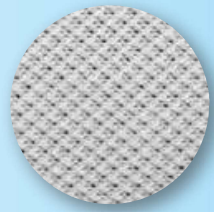

Snap Bag

This 32" long snap bag is handy for lowering into a vault or catch basin and is capable of holding 30 Vita-D-Chlor Tablets.

24" Coarse Sock

Simple and inexpensive, this sock easily holds about a dozen tablets.

24" Fine Sock

The fine mesh version of the sock drastically slows the tablet dissolve rate, as compared to the coarse mesh.
