Applications such as B.O.D. Determinations, Plant and Insect Studies, Fermentation Studies, and Bacterial Culturing

Our Refrigerated Incubators (often called B.O.D. Incubators or Low-Temperature Incubators) are used for applications such as B.O.D. Determinations, Plant and Insect Studies, Fermentation Studies, and Bacterial Culturing. SHELLAB Low-Temperature Incubator units have a temperature range of 0°C to 45°C.

SRI3 LOW TEMPERATURE INCUBATOR FEATURES

- Temperature range of 0-45°C
- Capable of holding a set temperature accurate to 0.1°C
- Low limit thermostat
- Temperature stability of +/- 0.2°C
- Temperature uniformity of +/- 0.5°C
- Independent OTL device/probe
- Independent low-temperature limit that prevents chamber dipping below 0°C
- Internal circulation fan to ensure uniform temperature
- Power source located inside the chamber
 - Two outlets inside chamber for SRI3 (120V American version)
 - Two outlet for SRI3-2 (240V European version)
 - Made in USA
- Perfect for running lab equipment inside the chamber

WHAT MAKES OUR SHELLAB SRI3 BETTER

Units are equipped with a hermetically sealed compressor, circuit breaker & fuses to protect from electrical overload, and an easy-to-clean, fully insulated chamber. Gentle, continuous forced-air circulation ensures temperature uniformity and reproducible test conditions. The Refrigerated Incubators also include an independent over-temperature safety controller, 3 adjustable shelf positions, two interior outlets to allow the use of shakers, stirrers, roller bottles, or other apparatus. The new shelf design have holes/slots/cutouts that actually increase the chamber airflow/improve uniformity and stability.
