

SHELOLAB

Ideal for Industrial, Analytical, and General Laboratory Applications

SGO3

SHEL LAB Gravity Convention
Laboratory Ovens are recommended
for critical scientific and analytical
use in laboratory and pilot
plant product research. Typical
applications include aging, curing,
drying, baking, pre-heating,
conditioning and life cycle testing.
Choose from three cabinet sizes,
each with gravity convection and
reserve heating power for quick
recovery after door openings.

- Fast ramp-up to 306°C for faster cycle times.
- Temperature range approximately 20°C above ambient to 306°C for multiple applications.
- Advanced PID temperature control system for sensitive response.
- Built-in digital timer for automatic operation following manual start.
- Independent overtemperature set-point and operational control override for additional safety.

- Stainless steel interior construction for long life operation, easy cleaning.
- Gravity Convection to provide gentle airflow and not disrupt delicate samples
- Triple-wall construction to minimize external surface temperature.
- Stainless steel shelves are adjustable on 0.5" (12.7 mm) centers to provide flexible inventory options.
- Rear access port, 1.75" diameter (44mm) for independent cables, instrumentation.
- Exhaust port, 3" diameter (44mm), adjustable, with external connection to customer-supplied vent for effluent exhaust if required.
- Internationally certified CAN/CSA, UL, EN, IEC 61010, and compliant with CE.

SGO Series Features and Benefits

SGO units are engineered for safe, accurate, and uniform performance in demanding laboratory environments.

Applications:

- · Baking and Curing
- Burn-in
- Aging Tests
- · Moisture and Stability Testing

SHELFLAB

ASTM, UL, and Life Testing

- Asphalt Testing
- Drying

SGO Series ovens are available in 110-120v, 220-240V, 50/60Hz configurations and achieve temperatures up to 306°C with fast ramp-up and recovery times.

Heat-Up Rapid heat-up times to 306°C depend on voltage selected. Published heat-up performance is based on a standard cabinet under controlled testing at a 20°C ambient temperature, line voltage ±10% of specified voltage.

Recovery Upper vents are closed when recovery times following door openings are tested. Published recovery performance is based on a standard cabinet under controlled testing at a (22 ± 3)°C ambient temperature, line voltage ±10% of specified voltage.

Extended Warranties!

US Domestic Only

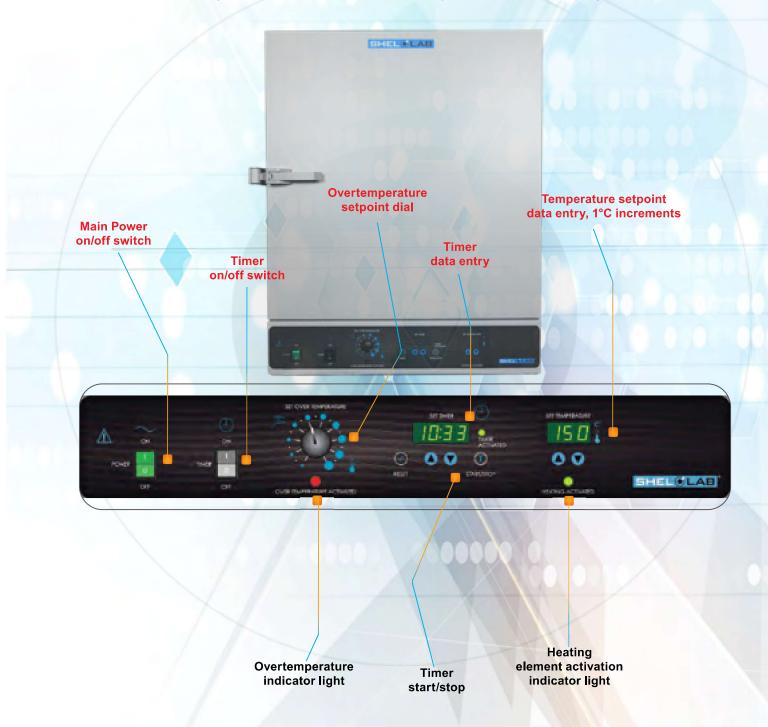

Control, Timer Program, and Monitoring

The advanced loop PID (proportional, integral, derivative) controller commands proportional power to the heating element to provide the most accurate and responsive control. Each controller is matched to the oven size to assure faster response to setpoint without overshoot, and quicker recovery following door openings. The on-board timer permits programmed dwell cycles with automatic shut-off for custom applications. Indicator lights are included for visual status feedback on critical functions.

Integrated Control Panel

All controls are centrally located on the main panel including manual power and timer on/off switches, independent overtemperature control, digital temperature and timer setpoint adjustments, and indicator lights for all functions.

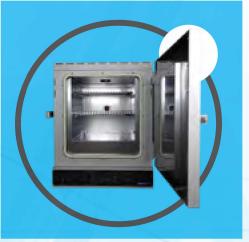

Model Part ID*	SLG322	SLG322-EA
Electrical, 50/60Hz, AC, 1Ø		
Voltage	110V-120V	220V-240V
Full Load Amps	14	10
Nominal Power (watts @150°C)	1008	1440
NEMA Plug Supplied	5-15P	6-15P
Temperature Range 20°C above ambient to 306°C	0 101	0-101
Heat-Up to Ambient — Minutes to 80°C	7	7
Heat-Up to Ambient — Minutes to 150°C	23	23
Heat-Up to Ambient — Minutes to 306°C	95	95
Recovery after Door Opening (30 sec.) — Minutes to 80°C	3	3
Recovery after Door Opening (30 sec.) — Minutes to 150°C	4	4
Recovery after Door Opening (30 sec.) — Minutes to 306°C	24	23
Recovery after Door Opening (60 sec.) — Minutes to 80°C	5	5
Recovery after Door Opening (60 sec.) — Minutes to 150°C	5.5	5.5
Recovery after Door Opening (60 sec.) — Minutes to 306°C	37	37
Temperature Uniformity		
At 80°C	2.5	2.5
At 150°C	3.5	3.5
At 306°C	4.0	4.0
Unit Specification		
Interior Volume, Nominal	3.0 cu.ft. (85 L)	
Interior Dimensions W x D x H	16.5" x 19.5" x 16.2" 419 mm x 495 mm x 412 mm	
Exterior Dimensions W x D x H	26.9" x 28.6" x 34" 684 mm x 727 mm x 840 mm	
Interior Construction	430 series stainless steel	
Exterior Construction	20 gauge steel, powder coated	
Shelves (See Accessories)*	3 (max of 7)	
Maximum Weight Per Shelf*	50 lb (22.6 kg)	
Permitted Total Load	200 lb (91 kg)	
Site Preparation and Installation Guides		
Door Swing Clearance (Nominal)	27" (686 mm)	
Wall Clearance, Sides	6" (152 mm)	
Wall Clearance, Rear	12" (305 mm)	
Exhaust Duct (Outer Diameter)	1.75" (44 mm)	
Unit Weight Empty	170.5 lb (77.3 kg) 203 lb (92 kg)	
Shipping Weight SGO3 Oven Options and Accessories	203 lb (92 kg)
	Comtact Cala C	or More Datail
Reverse Door	Contact Sales for More Details	
3" Access Port	Contact Sales for More Details	
Caster Platform	90000597 9751317	
Extra Wire Rack, 50 lbs (22kg); Includes Brackets	075	1217

Options must be specified when ordering. Contact Sheldon Manufacturing for additional information.

Many of our customers have found that pairing our Gravity Convection **Ovens SGO3** with the purchase of our Anaerobic Chambers is an ideal solution for their laboratory needs. The SGO3 ovens are perfectly suited for baking and sterilizing O2 Scrubber Cartridges, ensuring optimal performance and extending the lifespan of your anaerobic chamber systems. This combination not only enhances efficiency but also supports the meticulous standards required for maintaining an anaerobic environment. If you're looking to streamline your operations, this pairing offers a reliable and effective solution.

O, Scrubber **Cartridge**

^{*}Extra standard and reinforced shelves available. See Accessories.
