NEUSON**
all it takes!

Introducing:

WPU1550A | WPU1550Aw

Reversible Plates

New compact reversible plate

Wacker Neuson is introducing its smallest gasoline-powered reversible plate, the WPU1550A. The WPU offers similar features as the popular WP plate line, but with forward and reverse operation including spot compaction.

Easy to maneuver

The new WPU1550A reversible plate is easy to operate, compact and lightweight and designed to maneuver into tight spaces. It features an integrated transport wheel set for mobility around the job site and shop.

Performance

- Forward and reverse operation via a mechanical shift lever placed on guide handle
- Optimized base plate design provides superior handling on granular soil and fresh asphalt for a smooth finish
- Powered by proven Honda engine with low oil shut-off

Efficiency

- Responsive low vibration guide handle allows for comfortable operation and can be tilted forward to assist in uphill travel
- Integrated wheel set for easy transport on the job site and in the shop
- Large lifting eye and easy to grab frame makes moving and loading machine easy
- Water tank can be detached without tools for convenient refilling
- Water slots for equal distribution are integrated into the base plate

Maintenance

- Heavy-duty adjustable clutch and belt system
- Full frame protects engine and water tank from damage
- Base plate is made of high-quality nodular cast iron providing a long service life

Technical Data

	UNIT	WPU1550A	WPU1550AW
Operating weight	lb	224.9	231.5
Working width	in	19.7	19.7
Base plate size (l x w)	in	23.1 x 19.7x	23.1 x 19.7
Centrifugal force	lbf	3,372	3,372
Foward/reverse travel	ft/min	89	89
Area capacity	ft ² /hr	8,718.8	8,718.8
Gradeability	%	30	30
Vibration frequency	vpm	5,880	5,880
Engine		Honda GX160	
Max. rated power	hp/rpm	4.8/3600	4.8/3600
Fuel tank capacity	qt	3.8	3.8
Water tank capacity	gal	-	2.4
