

	P/N	2300 - chain cutter w/tool box, one set of chains w/bits and tools for the cutter
	Hose Con.	3/4", 1", 1 1/4"
	Minimum/GPM	50
	Dimensions	28.34" x 9.25"
	Weight	44,09
	Pipe Diameter	10" - 20" up to 32" w/extension kit sold seperate
	Rear Jets	3
	Turbine Jets	3
	Tier	3

**A heavy-duty cutter that leaves nothing in its path (flexible guide skid 10" - 20")**

The Turbo® III flexible chain cutter was engineered to be powerful, durable, user friendly and require low maintenance. Made from high quality stainless steel and aluminum, this heavy-duty cutter uses turbine technology in combination with 3D fluid mechanics to deliver unmatched cutting performance in its operating range. Roots, grease, mineral deposits and protruding taps do not stand a chance against this impressive cutter. The flexible guide skid is adjustable between 10" - 20" within 1/16", making it capable of handling offsets in the pipe. An extension kit increases the cutters operation up to 32". The cutter comes standard with one-piece ceramic inserts and a high-pressure swivel and is capable of use with recycled water.
