High Performance Rotating Nozzle

The **Gator** nozzles cut and remove roots, grease, blockages, and scale in various pipes: **Baby-Gator** and **Mini-Gator** ranging from 3" – 8" and **Gator** ranging from 6" – 24". Encased in a compact stainless-steel body the strong reinforced internal design rotates the head. 3D fluid mechanics in the head smoothly direct all the incoming high-pressure water to the four rotating jets in the rear of the head and one in front. These rotating jets create an extremely powerful 360 degree all around complete cleaning of the pipe, flushing, and removing debris in less passes. The offset front jet eliminates blockages easily and effectively. The case kit includes an additional skid for each size.

**5015 Baby-Gator nozzle is only available in the case kit.*
