OZ LIFTING PRODUCTS CASE STUDY

Space constraints are just one material handling challenge facing wastewater plant operators

CHALLENGE

Navigating space constraints, corrosive environments, and harsh weather posed major material handling hurdles at a wastewater facility. Heavy components and abrasive conditions risked safety and efficiency.

SOLUTION

OZ Lifting delivered a game-changing setup with four CompOZite davit cranes and 80 pedestal bases. These ultra-lightweight, corrosion-resistant cranes are easy to disassemble, move, and reassemble, by a single operator—no tools needed. With a 1200 lb. lifting capacity and flexible placement, they're perfect for demanding wastewater operations.

RESULTS

CompOZite davit cranes transformed operations by enhancing safety and efficiency. Reduced manual handling risks and quick crane repositioning minimized downtime. Durable and low-maintenance, OZ equipment slashed costs and extended service life, ensuring a safer, more productive work environment.

OZ BENEFITS

Benefit One

Enhanced worker safety by reducing manual handling risks.

Benefit Two

Optimized operational efficiency and minimized downtime.

Benefit Three

Dramatic cost savings realized through optimized equipment utilization, extended product life, and reduced operational expenses.
